EDUCATION

Master's degree in Finance
University of Economics, Prague   📅 2013 – 2016

Secondary specialization: **Data engineering** at Faculty of Informatics and Statistics

Title of the master thesis: Analysis of the Factors Affecting Credit Risk in Personal Lending

Finished master degree in study program finance, which provided me knowledge of the problems of financial markets, banking, insurance, national, local budgets and public finance. The study program included basic knowledge of accounting, financial statement analysis and financial management.

Secondary specialization in data engineering provided me introduction to basic data processing methods. The emphasis was also on getting acquainted with current research trends. I studied and got hands on data mining methods while solving practical problems, applied business intelligence and worked with web scraping, language processing and data quality management methods.

Bachelor's degree in Finance
University of Economics, Prague   📅 2010 – 2013

Title of the bachelor thesis: Foreign exchange reserves of China, reasons for holding reserves and adequacy
